APULIAN SKILL OF STONE

**HABITA** [COME BACK HOME], designed by **Bernardo Corbellini** and **Bice Dantona - Internotrentatre Studiocreativo**, proposes a well-known item like the bird house in a symbolic way. Forms are reduced to the essential and impressed into an elegant and durable material like stone. Designed for home gardens, terraces and parks, Habita also praises the belonging to a place, a home to come back to. Not a transient home, but one made of stone, which maintains a strong regional identity thanks to the use of local stone from Puglia.
